UNIVERSITY OF MARYLAND AT COLLEGE PARK

# Chancellor's Message to the Graduates

---

As Chancellor of the University of Maryland at College Park, I take great pleasure in congratulating you and your families. All should be proud of the dedication exhibited by each of you in attaining today's goal. You will need that same dedicated perseverance to pursue a career in the larger world you now enter.

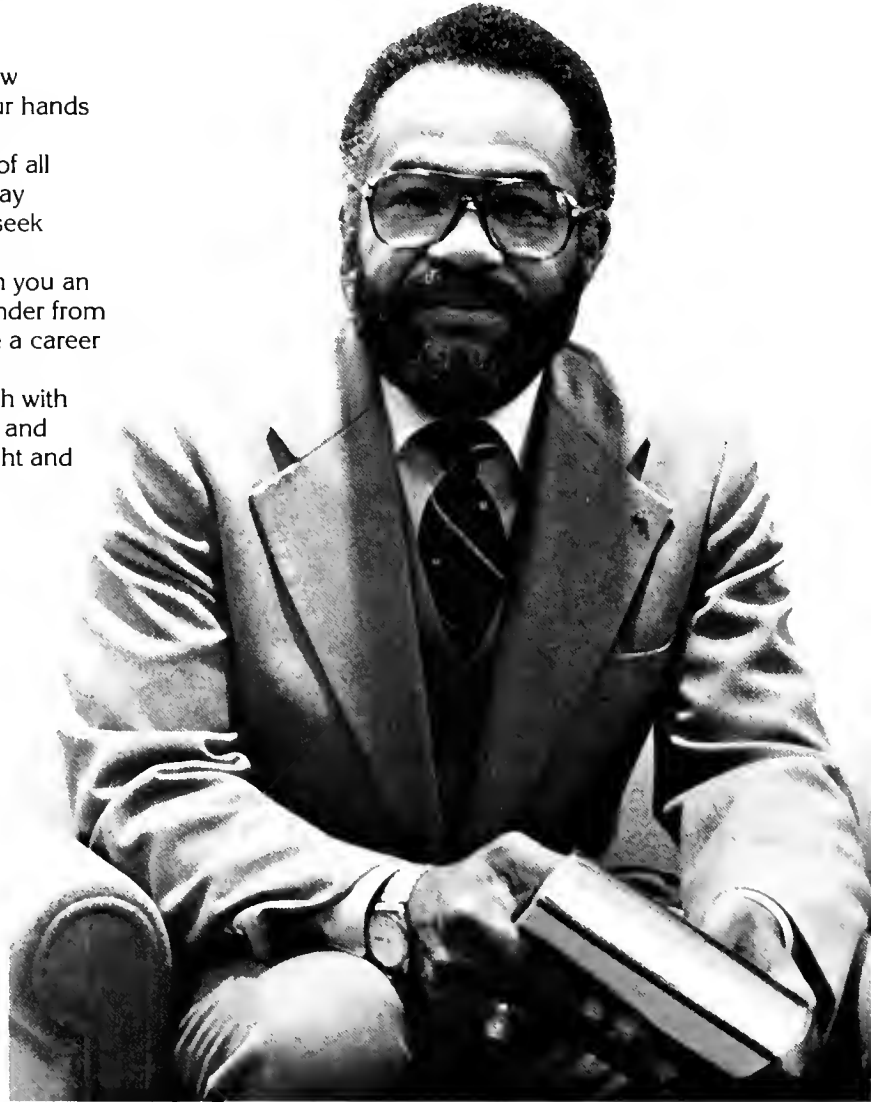

It is a world of change that brings new challenges to succeeding generations, a world of wonder in which new miracles of human achievement await the labors of your hands and intellects.

I believe that a sense of wonder stands at the center of all human inquiry. Our very survival and advancement today depend on that same sense of wonder—that ability to seek imaginative solutions to complex problems.

Whatever your major, it is my hope that you take with you an understanding of change and a deepened sense of wonder from your years at College Park. With them you must pursue a career for yourself and a future for all of us.

As you pursue that future, I ask that you keep in touch with your alma mater and share with all of us your thoughts and accomplishments so that this university, with your insight and help, may better serve tomorrow's graduates.

John B. Slaughter  
Chancellor

## The Graduates

The students graduating from the University of Maryland today follow in the footsteps of many notable UM graduates who have distinguished themselves in fields as diverse as science, the arts, entertainment, journalism, business, law, medicine and government.

Through Kermit the Frog, Miss Piggy, and others Jim Henson conveys a refreshing form of entertainment that touches the hearts of young and old alike. By the time he graduated from UM in 1960, Henson was developing successful TV commercials in the area. "The Muppet Show," created in 1976, is syndicated on about 125 stations in the U.S. and is seen in some 40 other countries.

The first woman elected to the Supreme Court of Michigan, Mary Stallings Coleman has been influential in developing many innovative programs for juvenile welfare. A 1935 Arts and Sciences graduate of UM, Coleman is a firm believer in rehabilitation and crime prevention and has established pre-court services for children in danger of becoming school drop-outs.

Known as one of the youngest graduates of the University, Charles Fefferman received a joint degree in mathematics and physics in 1966 at age 17. One of the world's top mathematicians, Fefferman received the Fields Medal, the most prestigious award a mathematician can receive. He is currently the Elkins Professor of mathematics at UMCP.

In the field of consumer affairs, UMCP graduate Meredith M. Fernstrom, rates as one of the nation's top experts on consumer issues. She is currently American Express Company's Vice President for Consumer Affairs, and before that she served as the Special Assistant to the Secretary and Director of Consumer Affairs in the U.S. Department of Commerce.

Other outstanding UM graduates include Connie Chung, a 1969 journalism graduate, who anchors the news at KNXT-TV in Los Angeles; Judith Resnick, a 1977 electrical engineering Ph.D. graduate, who as a NASA astronaut is slated to become the second American woman in space; and Tom McMillen, a 1974 Arts and Sciences graduate and Rhodes Scholar, who is playing professional basketball for the Atlanta Hawks.

## The Campus

In enrollment, College Park is among the 10 largest campuses in the country. Undergraduates enrolled in fall 1982 numbered 29,564 and graduate students, 7,482 for a total enrollment of

37,046. This year's College Park operating budget is approximately \$212,420,830. The University assisted over 18,000 College Park students with financial aid in 1981-82.

Students may choose from more than 110 undergraduate and 80 graduate programs leading to degrees. In 1981-82, a total of 5,390 undergraduate, 1,048 master's and 364 doctorate degrees were awarded by the College Park Campus. In the number of doctorates granted annually, the University ranks among the top 30 in the nation.

## History

The University had its beginnings in 1807 with the establishment in Baltimore of the College of Medicine, an entirely faculty-owned institution granting the M.D. degree. When its name was changed to the University of Maryland five years later, it was given power to confer additional degrees. The first dental school in America, the Baltimore College of Dental Surgery, became a part of the University in 1840.

Subsequently, the University opened schools of pharmacy, law and nursing. Under a charter secured by a group of Maryland planters in 1856, the College Park Campus of the University, then called the Maryland Agricultural College, opened in 1859 and became one of the original land-grant schools in 1865. After a disastrous fire in 1912, the State acquired control of the College and bore the cost of rebuilding.

The present form of the University of Maryland dates from the 1920 act of the Maryland state legislature, which united the State-owned institution at College Park and the professional schools in Baltimore, thus creating the University of Maryland at College Park (UMCP) and the University of Maryland at Baltimore (UMAB) campuses. Later, the University added three other campuses: Baltimore County (UMBC) at Catonsville; Eastern Shore (UMES) at Princess Anne; and the worldwide University College (UMUC), headquartered at College Park.

## Libraries

University libraries include approximately 1.5 million volumes on the College Park Campus, 19,600 subscriptions to periodicals and newspapers, plus over 1.5 million microform units.

The Hornbake (Undergraduate) Library has a seating capacity of 3,600 students and is among the nation's largest. Facilities include color video-tape players and playback units, enclosed rooms equipped with instructors' consoles for the use of nonprint media materials, and wireless stereo headsets for tapes of lectures, plays, speeches and music.

---

## Research Facilities

Among the exceptional research facilities on Campus are: scanning electron microscopes; subsonic, supersonic, and hypersonic wind tunnels; laboratories for radiation research and biochemical reactions; a nuclear training reactor; an electron ring accelerator; complete laboratories for the dynamic studies of soils and structures; a unique facility utilizing satellite remote sensing data; a dynamic photomechanics lab; a precision encoder and pattern recognition device; a gravitational radiation detection system including a gravimeter and three retroreflector arrays on the moon; a psychopharmacology lab; rotating tanks for laboratory studies of meteorological phenomena; a linear accelerator; a high resolution spectroscopy facility; a laboratory for basic behavioral research; an assortment of computers; a computer vision lab; the Astronomy Observatory; a laboratory for plasma and fusion energy studies; remote sensing and cartographics labs; specialized sound chambers for audiology research; a criminal forensics lab and the Water Resources Research Center.

The College Park Campus also operates one of the largest and most sophisticated long-wavelength radio telescopes (located at Clark Lake, Southern California).

In addition to these research opportunities, programs in the behavioral sciences, social sciences and education exist in many bureaus and institutes including: the Bureaus of Business and Economic Research; Educational Research and Field Services; Governmental Research; and Institutes for Child Study; Criminal Justice and Criminology; and Urban Studies.

## Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession are of ancient origin. They have been the traditional costume of the scholar since medieval times and probably represent an adaptation of the ecclesiastical dress since many of the scholars of that period were members of monastic orders.

An intercollegiate commission in 1893 drafted a uniform code for costumes which has since been adopted by the majority of colleges and universities in the United States.

Each of the three academic degrees—bachelor, master and doctor—has its own distinctive gown and hood. The bachelor's gown is distinguished by its long pointed sleeve. The master's gown has a longer, narrow, closed sleeve, extending below the knee; the arm is passed through a slit at the elbow. In contrast,

the doctor's gown has a full bell-shaped sleeve with three bars of velvet. The opening of this gown is faced with wide velvet bands. The velvet trim may be black or of a color indicating the general field of learning of the wearer, for example, blue for philosophy, green for medicine, purple for law.

The most colorful and distinctive item of the academic costume is the hood which passes around the neck and extends down the back. The doctor's is the largest of the hoods and the bachelor's the smallest. The bachelor's hood is often omitted. The color of the velvet edging indicates the field of learning. Below is given a list of department or faculty colors.

Agriculture/Maize  
Arts, Letters, Humanities/White  
Business Administration, Commercial Science/Drab  
Dentistry/Lilac  
Economics/Copper  
Education, Pedagogy/Light Blue  
Engineering/Orange  
Fine Arts, Architecture/Brown  
Forestry/Russet  
Home Economics/Maroon  
Laws/Purple  
Library Science/Lemon  
Medicine/Green  
Music/Pink  
Nursing/Apricot  
Oratory/Silver Gray  
Pharmacy/Olive  
Philanthropy/Rose  
Philosophy/Blue  
Public Health/Salmon  
Physical Education/Sage Green  
Science/Golden Yellow  
Social Service/Citron  
Surgical Chiropody/Nile Green  
Theology and Divinity/Scarlet  
Veterinary Sciences/Gray

The colors of the silk lining exposed in the center of the hood are those of the college or university which conferred the degree.

The cap or "mortar board" is uniform in design for all degrees. The tassel may be either black or the color of the field of learning. The tassel of the doctor's cap may be gold.

---

From Europe the use of academic degrees spread to English universities. Harvard University, the College of William and Mary, and Yale University followed the British pattern in the United States.

### **Academic Degrees**

The degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by American colleges and universities.

The first known degree was a doctorate conferred by the University of Bologna (Italy) in the middle of the 12th Century. Originally, the doctor's and master's degrees were used interchangeably, each indicating that the holder was qualified to give instruction to students. The bachelor's or baccalaureate degree indicated only entrance upon a course of study preparatory to the doctorate or mastership. Gradually, however, the bachelor's degree came to mean successful completion of one level of study preparatory to the higher degrees.

### **The Doctor's Degree**

This is a term meaning teacher, or instructor, applied by ancient Romans to those who delivered public lectures on philosophical subjects. In the Middle Ages, from the 12th Century, it came into use as a title of honor borne by men of great learning. It was first made an academic title at the University of Bologna, which received from the emperor the right of appointing *doctores legum* (doctor of laws). The University of Paris followed in 1145. Soon after, the popes granted the universities the right of appointing *doctores canonum et decretalium* (teachers of the canon law), and when the study of civil law came to be combined with that of the canon law, the title was changed to *doctor utriusque juris* (teacher of both laws). The faculties of theology and medicine followed that of law in conferring this title.

The doctorate in philosophy and science, and occasionally in theology and law, is given beyond the baccalaureate degree and requires two to five years of study, the writing of a thesis, and the passing of written and oral examinations. The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the professional or practitioner's degree and the research type. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Doctor of Dental Surgery, Doctor of Veterinary Medicine, Juris Doctor and Doctor

of Pharmacy. These degrees carry no implication of original research. The University of Maryland awarded the first two dental degrees in history, on March 9, 1841, and invented the name of the degree, D.D.S., as well.

The second type of doctor's degree is classified as the research doctorate representing prolonged periods of advanced study, usually accompanied by a dissertation which is designed to be a substantial contribution to existing knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States by Yale University in 1861.

The first Ph.D. was awarded by the University of Maryland in 1920.

### **The Master's Degree**

The master's degree is an academic honor conferred upon students who have successfully completed work in advance of the baccalaureate. A thesis and an oral examination are usually required. The word *magister*, connected with a qualifying phrase, was used among the Romans as a title of honor, but its present meaning must be traced to the time of the establishment of the oldest universities. Regularly organized faculties were not then known as they now exist in the universities. The whole circle of academic activity was limited to seven liberal arts, and those who received public honors on the completion of their courses of studies, for their diligence and knowledge, and had already received the degree of baccalaureate (bachelor) were called *magistri artium* (master of the liberal arts).

In 1920, the new University of Maryland awarded its first M.A. and M.S. degrees in fields other than agriculture.

### **The Bachelor's Degree**

The bachelor's degree represents completion of a four-year course of study of collegiate grade and is the oldest academic degree used by American institutions of higher learning. The degree, Bachelor of Arts, was the first conferred in America in 1642 on the first nine graduates of Harvard College.

Maryland Agricultural College, which was later to become the University of Maryland College Park, awarded the first Bachelor of Arts and Bachelor of Science degrees in 1862.

# Robert M. White

## Honorary Doctor of Science and Commencement Speaker

---

The professional field of Robert M. White gives him a distinct advantage. Whether or not one knows much about the weather, everyone uses it as a topic of social conversation. In Dr. White's case, he speaks with an international authority in meteorology and atmospheric science.

While an aviation cadet at Harvard University, he received the assignment of weather observer for the United States Army Air Corps—the beginning of a lifetime career. Graduating with a B.A. in 1944, he was honorably discharged from the Air Corps with the rank of captain two years later.

After a short detour into journalism and advertising, Robert White entered the Massachusetts Institute of Technology, receiving a Master's and a Doctor of Science degree in meteorology. The subject of his doctoral thesis, *Global Energy Balance*, has remained a research interest throughout his career.

Joining the U.S. Air Force as a civilian in 1950, Dr. White did research on the stratosphere at the Air Force Cambridge Research Center where he rose to be chief of the Meteorology Development Laboratory and directed important studies on statistical weather prediction and atmosphere dynamics.

In 1960 he became Associate Director of Weather Research for the Travelers Insurance Company in Hartford. When the Center became an independent research and development organization, Robert White directed it as president and played a key role in seeking ways to apply modern electronic data processing to weather analysis and forecasting.

His next position could have been easily predicted: a fellow Harvard graduate, President John F. Kennedy, appointed him chief of the U.S. Weather Bureau in 1963. Having arrived in Washington, D.C., in the years that followed he filled other eminent positions, among them Administrator of the National Oceanic and Atmospheric Administration, Executive Officer of the National Academy of Science, and currently President of the University Corporation for Atmospheric Research which operates the National Center for Atmospheric Research in Boulder, Colorado.

Dr. White was U.S. Permanent Representative to the World Meteorological Organization and Chairman of the U.S. Federal Committee on Meteorological Services and Supporting Research. He has also actively participated in a number of international cooperative programs, notably the World Climate Conference and the U.S./U.S.S.R. Joint Commission for Exploration of World Oceans.

A member of the many scientific institutions and learned societies, including the U.S. National Academy of Engineering, of which he is the president-elect, and the American Meteorological Society, Dr. White has written numerous papers and articles for scientific journals. His peers and colleagues have awarded him many accolades, among which are the Chevalier de la Legion d'Honneur, the International Meteorological Organization Prize, and the Rockefeller Public Service Award for Protection of Natural Resources.

Today he is awarded an honorary Doctor of Science degree.

# Candidates for Degrees

The 1983 class roster comprises degree candidates from the undergraduate and graduate programs at the University's College Park Campus. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The University reserves the right to withdraw or add names. All diplomas will be mailed by the Registrations Office.

Students who have earned their degrees from the College of Education may obtain a Statement of Certificate Eligibility at their department commencement reception or in the College of Education, Student Services Office (Room 1210). Other students who have completed teacher education programs will receive their statements in the mail (separate from the diploma) upon verification of required course work.

# Scholarship Honors

---

Candidates for bachelor's degrees who have earned honors of scholarship upon graduation are indicated in the alphabetical listings of Divisions, Colleges or School. To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed two years of work at the University of Maryland (60 semester hours, 30 of which were at College Park) and (2) have a scholastic average of B (Grade Point Average of 3.000) or higher in University of Maryland work prior to the last semester of registration before award of degree.

May 1983 candidates who meet these criteria are shown in the alphabetical lists as qualifying, upon graduation, for the designations "Summa Cum Laude" if they ranked in the top two percent of the candidates in their respective Divisions, Colleges or School; "Magna Cum Laude," if in the next three percent; or "Cum Laude," if in the next five percent, based on the grade point averages of students in the preceding three graduating classes of each degree-granting unit.

# A Walking Tour through the College Park Campus

There are many interesting educational and research facilities on the College Park Campus. We have selected some of these that you may wish to visit along a walking tour. These facilities are open on weekdays from 8:30 a.m. to 4:30 p.m., except where noted. You are welcome to tour them at your leisure. Other points of interest on campus may be toured by appointment through the phone extension listed after each facility. For general information, call the Student Union Information Center (454-2801).

## Highlights

*Memorial Chapel*—(Bldg. 009) Regents Drive. A schedule of multidominational services can be obtained in the North Administration Bldg.

*North Administration Building*—(Bldg. 052) Regents Drive. This facility houses the Offices of Undergraduate Admissions; Records and Registrations; Student Affairs; Student Financial Aid, and Resident Life.

*Hombake Library*—(Bldg. 147) Corner of Regents and Campus Drives. Completed in 1973, the library is one of the finest in the nation. In addition to serving undergraduate students, it also houses the graduate level College of Library and Information Services.

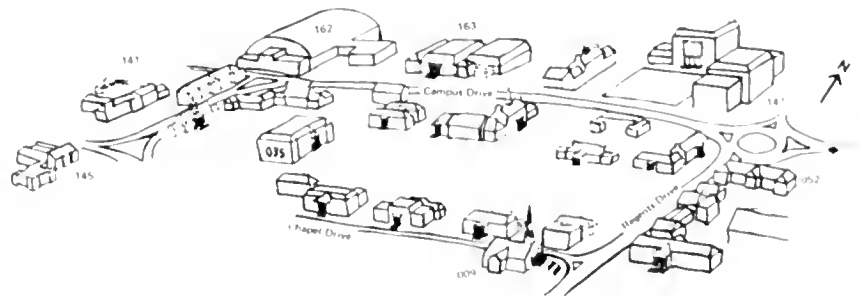

*Maryland Student Union*—(Bldg. 163) Campus Drive. A new addition to the Student Union was completed in 1972. You can obtain a building directory and schedules of events and activities at the information desk in the front lobby.

*Cole Student Activities Building*—(Bldg. 162) Campus Drive. With a seating capacity of 14,500 the arena of Cole is used for basketball games, track meets, wrestling matches, indoor tennis, commencements, concerts, academic testing, and many other indoor activities. Other areas of the building contain small gymnasiums, weight rooms, a swimming pool, classrooms, faculty offices, a ticket booth for athletic events, the Department of Intercollegiate Athletics, the National Policy Center on Women and Aging, and the Air Force Aerospace Studies Program (AFROTC).

*Taves Fine Arts Center*—(Bldg. 141) Campus Drive. Offices of the Department of Communication Arts and Theatre and the Department of Music are housed in this building. University Theatre is also located here (adjacent to Parking Lot #1).

*Schools of Architecture Building*—(Bldg. 145) Campus Drive. You are invited to walk through this facility and view displays of student architectural designs.

*Theodore R. McKeldin Library*—(Bldg. 035). McKeldin contains materials for the use of graduate students and faculty as well as undergraduates (ext. 5704).
